Become part of the UK's
**INTERNATIONAL
REFRIGERATION
COMMITTEE**

THE INTERNATIONAL REFRIGERATION COMMITTEE

The UK's International Refrigeration Committee was established in 1995 to promote international exchange and understanding of refrigeration in all its aspects. It achieves this through representation at the inter-governmental International Institute of Refrigeration (IIR).

THE IRC PROVIDES

- *Representation of UK industry needs* at Management meetings where the IIR programme of technical work in Commissions meetings publications and events is planned.
- *Organising of international Commission Meetings and Working Groups in the UK*, providing a showcase for UK innovation and research. Recent events have included the 6th IIR Gustav Lorentzen Natural Working Fluids Conference and the 1st IIR Cold Chain and Sustainability Conference.
- *Nomination of individual representatives to IIR Technical Commissions* where they have access to the latest developments in key technologies and applications.
- *Access to international news updates*, briefing events on international topics, informatory note bulletins, international journal articles, conference proceedings and invitations to IIR organised and cosponsored conferences across the globe.

WHY YOU SHOULD JOIN

The International Refrigeration Committee operates as a committee of the Institute of Refrigeration, a learned society with charitable status operating since 1899 to disseminate knowledge concerning refrigeration and its applications.

Membership is open to companies and individuals who wish to access this information and support the work of the IRC in promoting the development of opportunities for international exchange of information.

Membership subscriptions also contribute towards funding of the UK national membership of the International Institute of Refrigeration

THE INTERNATIONAL INSTITUTE OF REFRIGERATION (IIR)

The IIR is an intergovernmental organisation representing 62 member countries. It is involved in the exchange of knowledge through seminars, conferences, publications, and training courses. It advises governments and organisations on topics such as the adoption of new, more environmentally friendly refrigerants, standards for food refrigeration and training proposal for refrigeration technicians. Conference proceedings of the IIR are considered authoritative sources and form a major part of the world's published information on refrigeration technology and its applications.

See the comprehensive website of the IIR for more information at www.iifir.org

APPLYING FOR CORPORATE MEMBERSHIP

Corporate membership fees for IRC membership start at £- () +VAT. Find out more and apply online at www.iior.org.uk
