

## What can the Institute of Refrigeration offer you?

- IOR membership is for individuals and is a gateway to the most highly respected technical guidance on refrigeration, air conditioning and heat pump technology available.
- Our members are leaders in innovation, safety and technical knowledge and share their expertise at a range of events, publications and learning programmes suitable for people at all stages of their career.
- By joining the IOR you will gain access to a unique network of experience, opportunities to develop your knowledge and your career and gain recognition through the IOR membership grading process and Engineering Council registration.

### Benefits of Membership

- Recognition of your status in the sector with the initials after your name for Member (MInstR), Associate (AMInstR) and Technician (TMinstr) membership
- Access to IOR publications including practical guidance notes, Codes of Practice, updates on regulations and much more
- Refrigerant Codes of Practice covering all refrigerant groups to help interpret requirements of safety standards and regulations
- Professional Development events and training with CPD certification
- Regular newsletters and updates on technology or legislation changes
- Regional technical talks and meetings
- Engineering Council recognition at Chartered, Incorporated or Technician grade

Representing the full range of applications, our members are drawn from many different occupations and interests such as equipment end users, designers, installers, technicians, students, sales engineers, consulting engineers and business owners, food technologists, business entrepreneurs and researchers.

To become a member of the IOR you must complete an on-line application form which details your experience and knowledge of refrigeration, air conditioning and heat pumps.

### Membership Grades available

- Student and Young Person Member
- Technician Member (TMinstr) for those holding suitable qualifications
- Affiliate for non-technical persons
- Associate (AMInstR) for those fairly new to the industry
- Member (MInstR) for those with significant responsibilities and experience
- Fellow (FInstR) for those with high levels of experience and expertise
- Service Engineer special interest group open to hands on technicians

Grades are according to your experience and knowledge and provide independent recognition of your status in the industry.
